

## **MODICIDE 340**

### **Zur Konservierung der Bohrspülung**

#### **Gram-positive Bakterien**

Staphylococcus aureus	Streptococcus uberis
Staphylococcus epidermidis	Corynebacterium pyogenes
Streptococcus pyogenes	Corynebacterium ulooerans
Streptococcus faecalis	Bacillus subtilis
Streptococcus dysgalactiae	Bacillus cereus
Streptococcus agalactiae	

#### **Gram-negative Bakterien**

Pseudomonas aeruginosa	Escherichia coli
Pseudomonas putida	Salmonella typhimurium
Pseudomonas cepacia	Salmonella typhi
Pseudomonas stutzeri	Salmonella enteritidis
Pseudomonas fluorescens	Salmonella paratyphi B
Nicht klassif. Pseudomonas	Salmonella ser. thompson
Proteus vulgaris	Salmonella ser. dublin
Proteus mirabilis	Salmonella ser. heidelberg
Proteus morgani	Salmonella ser. seftenberg
Proteus rettgeri	Salmonella abortus-equi
Proteus inconstans	Salmonella gallinarum
Klebsiella pneumoniae	Shigella flexneri
Klebsiella aerogenes	Shigella sonnei
Enterobacter aerogenes	Desulphovibrio desulphuricans
Flavobacterium meningosepticum	Serratia marcescens
